AtrocityWatch Hackathon for Humanity

June 6, 2014

What if big data technology could save lives? How would you build a platform to detect and prevent atrocities? What if we disrupted atrocities? Can you help us build the tools to make a safer 21st century?

Our Mission:

Who:

Hackers, Designers, Big Data practitioners, Data Scientists, Mentors, and do-gooders
who want to give voice to those who need it most

What:

Help us spot Atrocities before they occur by analyzing social media
& raising awareness when Atrocities occur

Where:

Cloudera
1001 Page Mill Road
Palo Alto, CA 94305

When:

June 6, 2014.
3 PM – Midnight.

Details:

Registration is free

1st Place Prize is $1000 (if a team wins, the prize is split between team members)

Bring your own laptop

All participants will receive $50 Amazon Web Services credit

Cloudera is providing food and beverages

All submissions have the potential of saving lives

We ask that submissions be licensed under the Apache Software License
